Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Thursday 30 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Remaining changeable but very mild over the coming days.

Today:
A cloudy and damp morning, with the rain heavy and persistent over the Pennines. It will turn drier for a time during the afternoon, before further rain arrives later. Despite the cloud it will be a very mild day. Maximum temperature 14 deg C (57 deg F).

Tonight:
It will be rather wet and increasingly windy evening and night. It is likely to turn drier later in the night with temperatures staying in double figures for some. Minimum temperature 7 deg C (45 deg F).

Friday:
New Year's Eve will start rather grey and damp, but it should turn drier and brighter throughout the afternoon. Remaining mild with winds easing. Maximum temperature 14 deg C (57 deg F).

Outlook for Saturday to Monday:
Sunny spells and scattered blustery showers but staying very mild on New Year's Day. Remaining windy with further showers on Sunday and Bank Holiday Monday but feeling colder.
